LIFE & DEATH

MISTERO

MISTERO

Si può “uccidere” la morte ?

Il Problema?

Trasferire 7 miliardesimi di DNA

La soluzione:

Attraverso la "riproduzione"

In che modo ?

Ammalandosi…

(la "riproduzione" è una malattia sessualmente trasmissibile)

Edward Bellamy

a viaggiare verso l'eternità…

"Che carini! A che servono?".

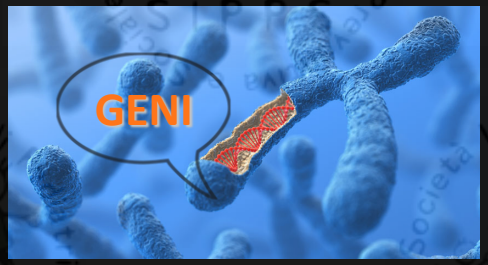
La data della nostra morte ?

TELOMERI

Raccontano cosa succede all'interno del genoma



Mol Ecol. 2013 Jan;22(1):249-59.
Telomere length and dynamics predict mortality in a wild longitudinal study.
Barrett EL et al.1
School of Biological Sciencesrk, Norwich, Norfolk UK.

Quanto durerà la nostra vita

Our results provide the first clear and unambiguous evidence of a relationship between telomere length and mortality in the wild, and substantiate the prediction that telomere length and shortening rate can act as an indicator of biological age further to chronological age when exploring life history questions in natural conditions

Adesso e nell'ora della nostra morte…

Exosomes of pasteurized milk: potential pathogens of Western diseases.

Melnik BC & Schmitz G.

Department of Dermatology,
Environmental Medicine and Health Theory,
University of Osnabrück, Osnabrück, Germany.

Institute for Clinical Chemistry and Laboratory Medicine,
University Hospital Regensburg, University of Regensburg,
PMID: 30602375

Exosomes of pasteurized milk
may represent new pathogens
that should not reach the human food chain.

ESOSOMI

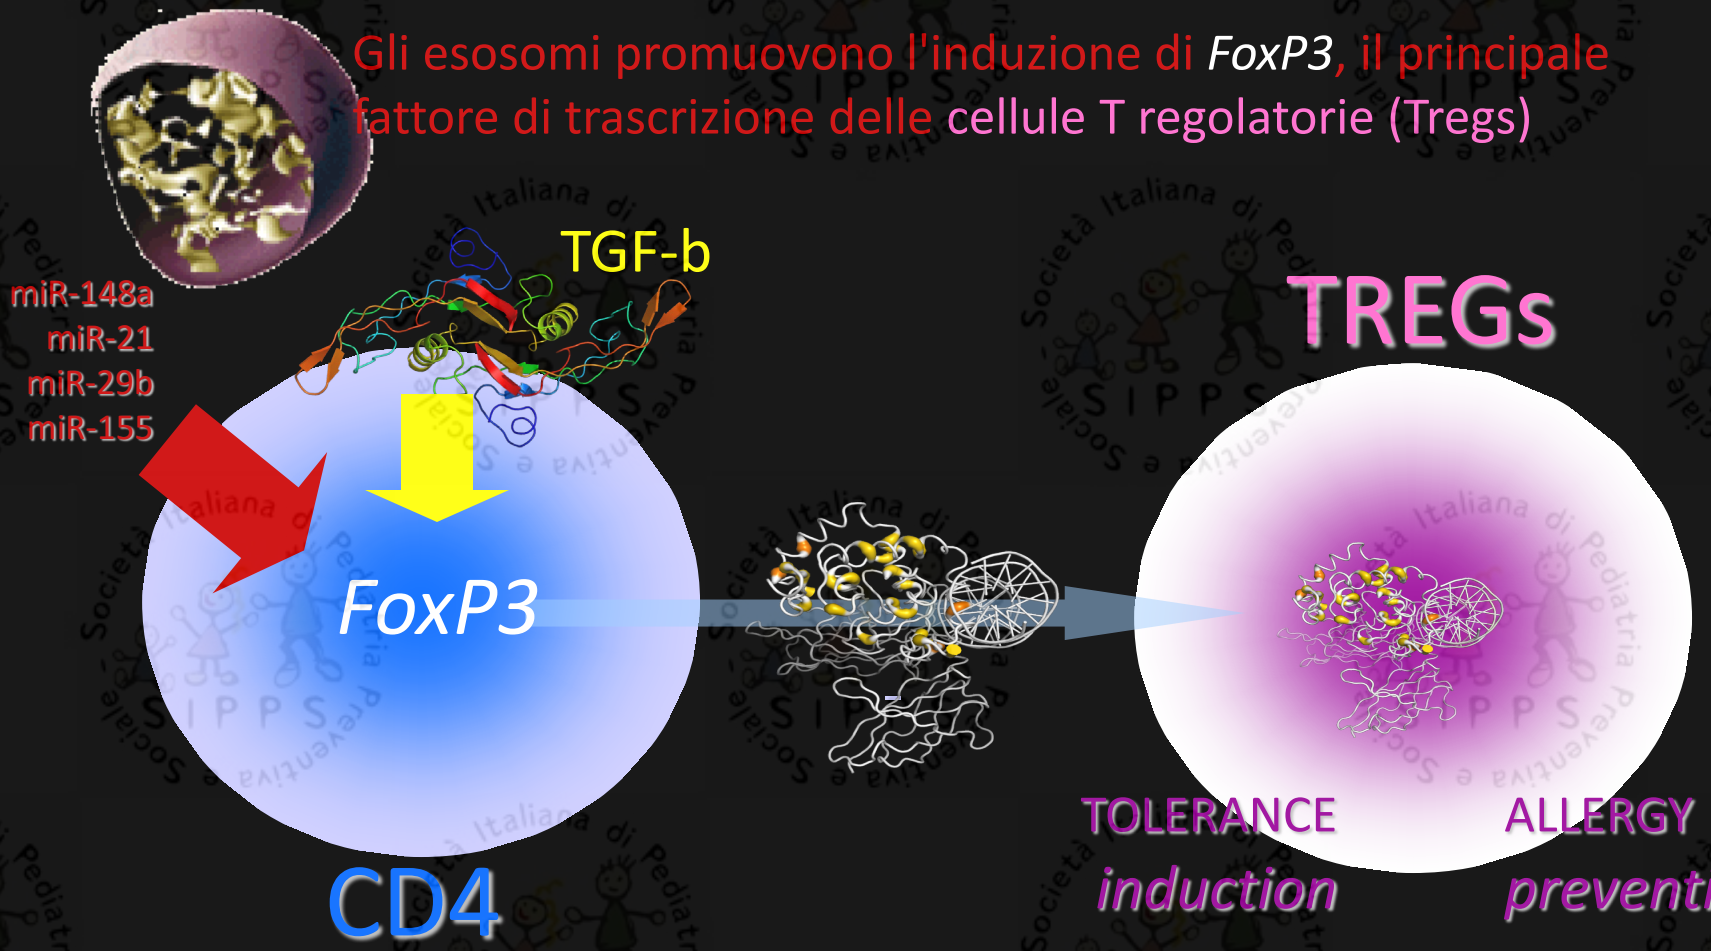
La pastorizzazione del latte vaccino protegge le vitamine termolabili e altri composti organici

Non altera gli esosomi bioattivi/ biodisponibili e le vescicole extracellulari di 40-120 nm

Tuttavia, le prove epidemiologiche e traslazionali presentate in questa revisione indicano che

l'assunzione prolungata di esosomi attraverso il latte pastorizzato può portare un rischio per malattie croniche

Gli esosomi promuovono l'induzione di *FoxP3*, il principale fattore di trascrizione delle cellule T regolatorie (Tregs)



Questo meccanismo previene lo sviluppo di allergie durante l'allattamento o il consumo di latte crudo durante la prima infanzia

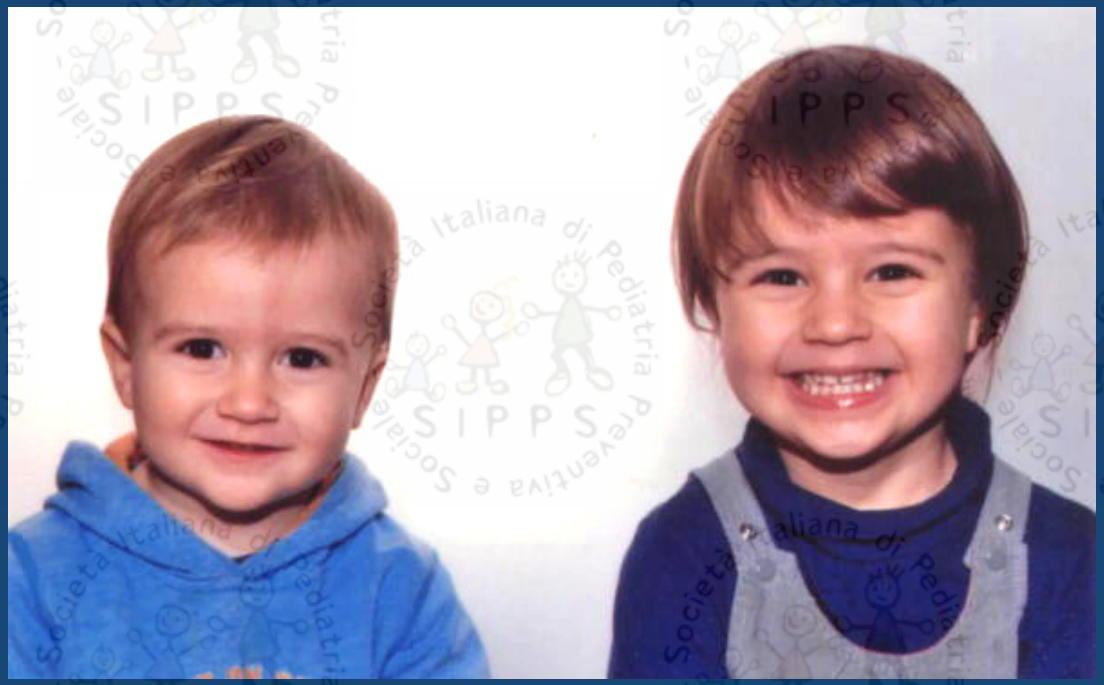
riesce ad usare
vengono chiamati nonni.

I nonni sono coloro che
vengono da lontano
e vanno via per primi
ad indagare oltre la vita….

Vi ringraziamo per l'attenzione



che avete dedicato a nostro nonno

Giulia e Jozio
